CornerSafe

FOUNDING CLUB VALIDATION

Clear parent updates. Consistent junior-session records.

Parent communication and session-record software for youth boxing and martial-arts clubs.

THE AFTER-CLASS ROUTINE

The coach records the session once. Parents receive a clear, approved update. The club retains a timestamped record.

01

Coach Check-Out

A mobile-friendly checklist for activities, contact, sparring, equipment, attendance and follow-up.

02

Parent View

A clear view of coach-approved sessions, participation choices, progress and club support contacts.

03

Welfare Overview

A focused queue for missing records, defined mismatches and matters requiring human review.

Built for the details generic club software misses

Pad work, partner drills, technical sparring, body-only sparring, open sparring, contact levels and protective equipment are recorded explicitly - not hidden inside a generic activity note.

What clubs gain

- Clearer parent communication
- A consistent session history
- Visible consent and follow-up status
- A workflow designed for coach approval
- Stronger school and partner proposals

A responsible boundary

- No automated safeguarding decisions
- No replacement for policy or professionals
- No direct AI sending to parents
- No certification that a club is safe

SCHOOL & COMMUNITY PARTNERSHIPS

Present clearer junior-programme evidence to schools and community partners through consistent records and parent communication.

FOUNDING CLUB PILOT PROGRAMME

Help shape CornerSafe with us

Founding-club pilots are opening in Australia. Explore the fictional-data demo, test the coach workflow and help determine what would make CornerSafe worth paying for.

WORKING DEMO

Available for guided review

Validation prototype - fictional information only. Not for real children's records.

CornerSafe is a working name. September 2026.
